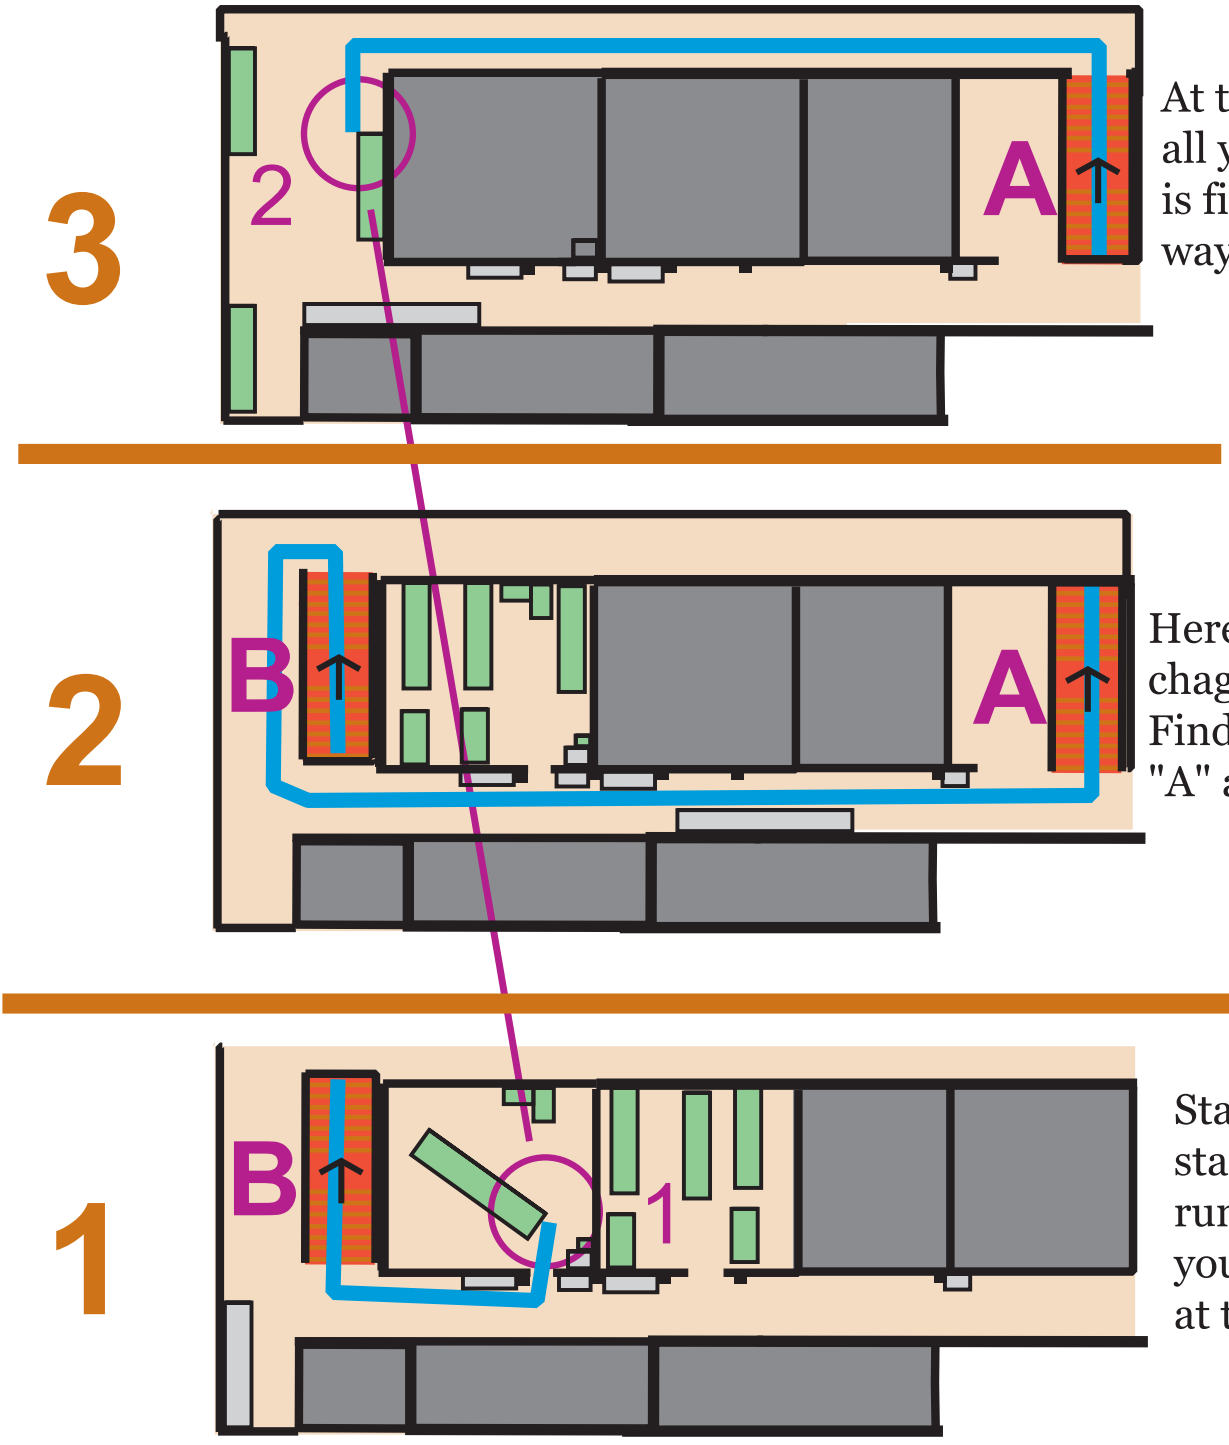
How to change floor

All the stairs have a red colour, a letter and an arrow that shows what direaction you are running. If you run in the same direction as the arrow you are running upwards. If thereis another stair on another floor with the same letter, it´s the same stair. The blue line shows how to run in this example.



At the third floor all you have to do is find the quickest way to the control.

Here you have to chage to another stair. Find a way to stair "A" and run upwards.

Start with finding stair "B". When you run this upwards you will find yourself at the second floor.
