Map adjustments

Harvesting and thinning have been carried out in the competition area after the map was printed.

New clearcuts and trailer tracks that are not reported on the competition map have been added. This applies generally to Damkavlen and Tiomilakavlen. Ungdomskavlen is not affected at all.

In particular, it concerns:

Ladies leg. 4 that have control 6 (194) out on a new clearcut.

Tiomila leg. 8 control 15 (144) and leg.10 control 19 (144) have a control at the edge of a new clearcut.

These two map adjustments are available with a map at check-in. Some of the other legs in the Damkavle and the Tiomilakavle may pass these two clearcuts, but it is not something that affects the accessibility. There is another new clearcut that is set up at the check-in. It can be passed, but only applies to legs in the Tiomilakavle.

There has also been added a 2 m high game fence that touches leg. 1-4 (code number 54) in the Tiomilakavlen. The fence is partially removed, and smaller openings are found around the fence so you can pass through without any problems.
