## PM Wind shelters

### Wind shelters

You will find your own place on the separate map of shelters. Maps are also posted in the area. The numbers of the shelter sites are marked with signs.

### Toilets/service buildings

Toilets at Skellefteå Camping's service building may be used. Key cards to service houses must be returned to the 10MILA information center when you leave. We do not have any extra cards, so keep track of the card you have been assigned.

No shoes with metal studs are allowed in Skellefteå Camping's toilets, service buildings or inside the arena.

### Car park

Please use the designated parking spaces. No cars may be parked by the shelters. However, it is allowed to drive in and unload equipment. The campsite's gates are locked and the key card to the service buildings also works at the gates.

### Electrical sockets

There are electrical outlets near most shelters, but not all, so we assume that you can share the electrical outlets with other clubs. You need to bring your own extension cords, we do not provide that.

### Fire extinguishers and defibrillators

Skellefteå Camping map shows where all fire extinguishers are located. Defibrillators are available both at Skellefteå kraft arena and at the reception at Skellefteå Camping.

### Free WiFi

In the camping area is called the network "Skellefteå open" and in the arena "10Mila-Publik"

### Contact person for wind shelters

Skellefteå OK Kurt Lundberg 070-5686161
